E-Cycle Connect: Business Model Canvas

Team LOGICLOOP | Technology and Sustainability (2026CSAE102) | Milestone 2

Trust in verified partners holds the model together

business model canvas · 9 blocks

Notes on the Model

- The revenue streams are proposals. They have not been tested with real partners yet.
- Trust is the core of the model: only verified partners can take recycling, which keeps the other blocks working.
- The main SDG link is SDG 12. The recommendations favour reuse and repair first, and recycle when a device cannot be saved.
